SUMMARY

Strategic Senior Network Engineer with **8+ years** of experience leading full-lifecycle deployments across 50+ enterprise sites, large-scale campuses, and warehouses. Expert in architecting high-availability cores using **Cisco 9500/9800**, **Arista 7050SX3**, and **Nexus 9K** platforms. Specialized in driving operational savings through **Aruba/Silver Peak SD-WAN** migrations and securing global infrastructure with Cisco ISE (NAC/NDA) and **Fortinet G-Series** firewalls. Proven track record of reducing site deployment costs by \$20,000 per location through optimized BOM design and vendor consolidation.

WORK EXPERIENCE

Network Engineer III | Global Infrastructure | Aug 2021 – Present

- **Multi-Site Deployment:** Directed end-to-end network architecture for **35+ new and remediated sites**, including large warehouses and office campuses, utilizing **Cisco 9500** cores and **Arista 7050SX3** top-of-rack switches.
- **SD-WAN Migration:** Engineered the migration of 35+ global sites to **Aruba SD-WAN**, replacing legacy circuits to prioritize business-critical applications and improve bandwidth efficiency by 40%.
- **Cost Optimization:** Achieved **\$700,000+ in total savings** (\$20k per site) by designing cost-effective Bill of Materials (BOM) and consolidating hardware vendors for switching and SFP procurement.
- **Global ISE Architecture:** Designed and deployed **Cisco ISE** across NA, EU, and AP regions; managed 50+ NAC appliances and 14 NDA appliances to provide high-availability authentication (802.1x) and profiling services.
- **Security Segmentation:** Implemented **Fortinet Firewall (201G/401G/601G)** solutions to segregate manufacturing OT environments and 3rd-party vendor access, minimizing cyber risk exposure.
- **OOB Management:** Integrated **Opengear Out-of-Band** management across all remote sites to ensure 99.9% uptime and **zero-touch** troubleshooting capabilities.
- **Wireless:** Configured **9800,5520 WLCs** with local and flex connect setup with **91k, 35k and 28k Aps**.
- **Got recognition and appreciation for deploying network with cost efficiency and in short periods of time.**

Senior Network Engineer | ExxonMobil | Oct 2017 – July 2021

- **Global Scale Migration:** Led the migration of endpoints across **1,000+ sites** from legacy ACS to **Cisco ISE**, implementing MAB and 802.1x authentication for tens of thousands of devices.
- **Enterprise SD-WAN:** Executed site migrations from MPLS to **Silver Peak (EdgeConnect)** SD-WAN using Orchestrator 9.x, ensuring seamless redundancy via VRRP and tunnel optimization.
- **Templates:** Developed standardized configuration templates to migrate **5000+ switches** to ISE, significantly reducing manual errors and deployment timelines.
- **Infrastructure Lifecycle:** Managed global routing/switching environments including Cisco ISR, Nexus, and ASA platforms; performed hitless upgrades (2.4 to 3.0) on ISE clusters using redundancy protocols.

Network Engineer (NOC) | Comerica Bank | June 2016 – Sep 2017

- **Infrastructure Monitoring:** Monitored critical ports and internet circuits for regional banking centers; responded to alarms and resolved root-cause issues to maintain financial service stability.
- **Vendor Coordination:** Collaborated with ISPs (AT&T, Spectrum) and hardware vendors to troubleshoot circuit outages and RMA faulty equipment.

TECHNICAL SKILLS

TECHNICAL SKILLS

- Core & DC Switching: Cisco Catalyst 9500/9800, Nexus 9K/7K/5K, Arista 7050SX3 (ToR), Dell VEP.
- Routing & SD-WAN: Aruba SD-WAN (EdgeConnect/Silver Peak), Cisco ASR/ISR, BGP, OSPF, EIGRP.
- Security & Identity: Cisco ISE 3.x (NAC/NDA/TACACS+), Cisco ACS, Fortinet FortiGate (201G/401G/601G), Cisco ASA.
- Wireless: Cisco WLC 9800/5520, Catalyst 9100/2800/3500 APs.
- Management & Tools: Opendgear OOB, Cisco ACI, SolarWinds, Wireshark, Microsoft Visio.

EDUCATION

M.S. in Networking and Telecommunications, Kent State University, US	GPA: 3.7
B. Tech in Electronics & Communications, JNTUH, India	GPA: 3.7
